Allowable Subject Matter

1. Claims 1 through 3 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose obtaining an independently estimated vertical velocity of the vehicle; performing Fletcher Powell cardinal searches on the first cost function beginning with the independently estimated vertical velocity, to find a main lobe velocity at a minimum value of a lobe of the first cost; and both adding and subtracting a lobe spacing velocity increment from the main lobe velocity, to determine a first and second side lobe velocity. The closest prior art is Winje, 5381384, which discloses finding two cost functions and by correlating the minimums determining the true velocity. Winje provides no suggestion of performing un-constrained minimizations through a conjugate gradient method, such as the Fletcher-Powell method, and only performing one such minimization on the lobe given by an independent velocity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Broadhead whose telephone number is 703-308-9033. The examiner can normally be reached on Monday through Thursday.
